PROFESSIONAL SUMMARY

Motivated CSE student with a strong foundation in Front-End Development, specializing in building responsive and user-friendly web interfaces using HTML, CSS, and JavaScript. Experienced in designing interactive applications with a focus on clean UI, intuitive UX, and optimized performance. Proactive problem-solver with excellent communication skills and a passion for creating polished digital experiences through hands-on projects and continuous learning.

SKILLS

Programming Languages:
- Python
- C
- C++
- HTML
- CSS
- JavaScript

Core Computer Science:
- Data Structures
- DBMS (Fundamentals)
- OOPs

Data & Tools:
- Data Labelling
- Data Annotation
- MS Excel / Google Sheets

WORK HISTORY

Data Labelling & Annotation
Virtual Experience | Forage | Remote
- Completed tasks on message classification, sentiment analysis, and PII identification.
- Reviewed labelled data for accuracy, gaining exposure to AI data preparation workflows.

Student – Self Projects & Coursework | Remote
- Developed front-end web projects to strengthen UI/UX design, layout structuring, and DOM manipulation.
- Built Python projects to reinforce programming fundamentals, logic building, and error handling.

PROJECTS

Python Calculator
- Developed a menu-driven application to perform fundamental arithmetic operations with a clean, structured layout.
- Implemented robust input validation and error handling to gracefully manage invalid or edge-case entries.
- Designed modular code structure separating UI logic from computation for better readability and maintainability.
- Tested across multiple input scenarios to ensure consistent and reliable output for all arithmetic functions.

Smart Expense Calculator
- Designed an interactive tool to track and categorize daily expenses with structured user input management.
- Implemented dynamic expense categorization logic enabling users to organize spending across multiple categories.
- Built summary reporting feature to display total and category-wise expenditure for better financial visibility.
- Focused on intuitive data flow and clean UI presentation, simulating a real-world personal finance dashboard.

Student Dashboard
- Created a front-end interface to manage and display student records and academic performance data.
- Leveraged structured HTML/CSS layouts to build a responsive, readable, and visually organized dashboard.
- Integrated data entry and retrieval functionality using core programming logic for real-time record updates.
- Designed the interface with scalability in mind, making it adaptable for real-world academic management use cases.

EDUCATION

Bachelor of Technology: Computer Science Engineering | Expected: 08/2028
C.V. Raman Global University – Bhubaneshwar, Odisha | 2nd Year, 4th Semester | CGPA: 8.89 | GPA: 3.56

INVOLVEMENT

- Actively learning front-end development and programming concepts through coursework and online resources.
- Completed virtual training programs and academic mini-projects focused on web development and UI design.
- Interested in gaining practical experience through front-end development internships.
